PROFESSIONAL SUMMARY

Third-year Computer Science and Engineering student with hands-on experience building full-stack web applications, REST APIs, authentication workflows, and database-backed systems. Skilled in Java, Python, JavaScript, C#, React, Next.js, Node.js, ASP.NET Core and SQL/MongoDB. Seeking a software development internship to contribute to an engineering team while delivering scalable, production-ready solutions.

TECHNICAL SKILLS

Programming: Java, Python, C, C#, JavaScript

Frontend: HTML, CSS, React, Next.js, Tailwind CSS, Material-UI (MUI), Bootstrap

Backend & APIs: Node.js, Express.js, ASP.NET Core Web API, FastAPI, Entity Framework Core, LINQ, REST APIs, JWT Authentication

Databases & Tools: MongoDB, SQL Server, Git, GitHub, Linux (Arch), FluentValidation, Postman

EDUCATION

B.Tech., Computer Science & Engineering — Darshan University | 2024 – 2028 (Third Year) | CGPA: 7.52

Class XII (GSEB) — Phoenix Institute | 77.5% | 2024

Class X (GSEB) — Bright School | 79.2% | 2022

SELECTED PROJECTS

Cardiovascular Disease Prediction | Live Demo

- Built an end-to-end healthcare web application to estimate cardiovascular disease likelihood from clinical indicators and patient lifestyle parameters.
- Performed data preprocessing and Chi-square statistical feature selection in Python, training a Gradient Boosting classifier achieving 73.6% accuracy across 70,000+ patient records.
- Engineered a FastAPI REST backend and a responsive React and Tailwind CSS risk-assessment dashboard for real-time clinical predictions.

Hospital Management System (NexusHealth)

- Architected a full-stack healthcare management platform using React, Tailwind CSS, Material-UI, ASP.NET Core Web API, and SQL Server.
- Designed RESTful controllers using Entity Framework Core migrations, LINQ queries, DTO mappings, and FluentValidation to ensure strict data integrity.
- Implemented JWT role-based access control for Admins, Doctors, and Patients, supporting self-registration, staff administration, and appointment workflows.

Airbnb Clone

- Created a full-stack vacation-rental web platform following MVC architecture using Node.js, Express.js, MongoDB Atlas, EJS, and Bootstrap.
- Implemented Passport.js session authentication, authorization middleware, RESTful CRUD routes, Joi server-side schema validation, and connect-flash notifications.

HACKATHONS & LEADERSHIP

- Smart India Hackathon (SIH) 2026: Designed the technical architecture for Problem Statement 147 (IntelliWave), proposing a hybrid AI and Digital Signal Processing (DSP) pipeline for automated feature extraction and signal classification from .WAV and .IQ audio streams.
- Model United Nations (MUN) Co-Organizer: Led event planning, participant coordination, and cross-team execution, strengthening leadership and communication skills.

LANGUAGES

- English, Hindi, Gujarati
